Dmytro Sherembey,
Head of the Coordination Council
of CO «100% LIFE»

Another fantastic year is over. We have re-branded our organization, we have become even more persistent in our fight for life. We launched new global projects, commenced a Global Fund grant with our partners, opened Medical Center «100% LIFE» in Kyiv, which was visited by Sir Elton John, and this is just to start with. Our amazing team continues to reform the health care system every day and to protect the life in every region of Ukraine. This is what motivates and leads us every day, and no force will stop us

Alla Shcherbyska,
Advisor to the Director General
of the Center of Public Health
of the MoH of Ukraine

Roman Hailevych,
Director of UNAIDS in Ukraine

UNAIDS is a partner of all associations of people living with HIV. But being included to their supervisory bodies is a rare thing. CO «100% LIFE» in many respects is a unique and advanced organization. The new name of the organization is a change in the paradigm and mindset based on the ability to leave unnecessary things behind and focus on building the future. CO «100% LIFE» does not establish lifelong unconditional leadership mandates, but rather gives new leaders the opportunity to shine. Today, while other NGOs continue to rely on donors' support or social contracts, «100% LIFE» has managed to find new strategic opportunities in the reforms taking place in the country. On behalf of UNAIDS, I sincerely wish you success in those areas

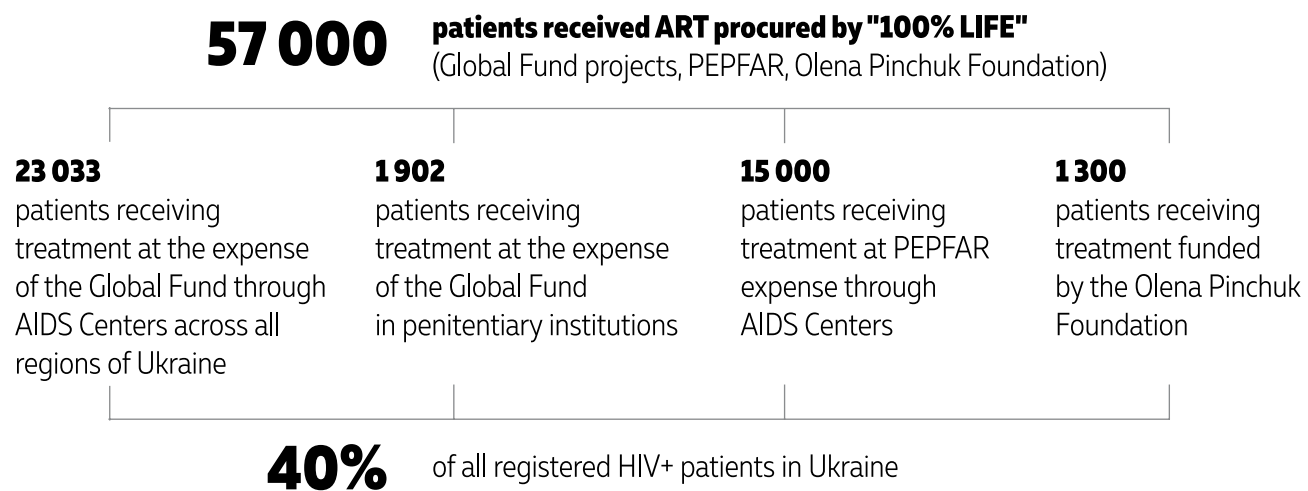

UAH 516,854,113.74*

the amount of the Network investments in the lives and health of Ukrainians

CO «100% LIFE» is recognized as the largest charity of the country in terms of the amount of money invested in charitable activities for the second year according to the Ukrainian Forum of Philanthropists.

PROJECTS

100%LIFE

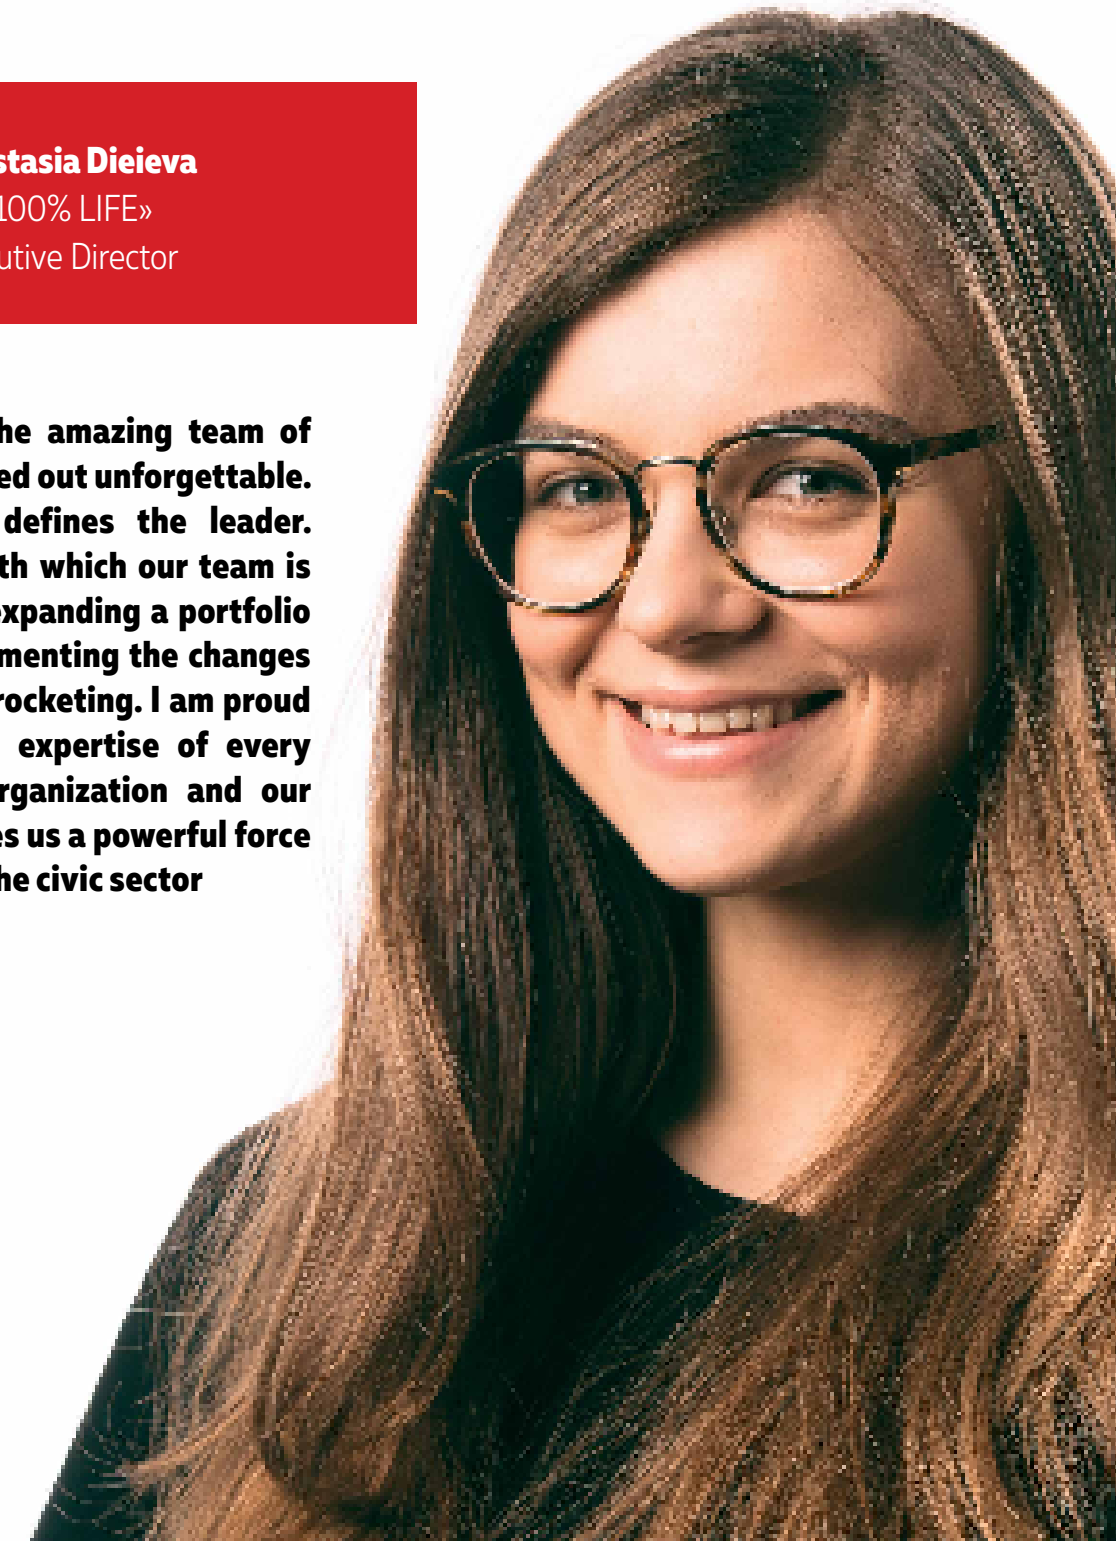

Anastasia Dieieva

CO «100% LIFE»

Executive Director

My first year with the amazing team of CO «100% LIFE» turned out unforgettable. It's the team who defines the leader. And the dynamics with which our team is gaining momentum, expanding a portfolio of projects and implementing the changes in the country is skyrocketing. I am proud of the fact that the expertise of every individual in the organization and our team as a whole makes us a powerful force setting standards in the civic sector

PROJECT
REDUCING THE BURDEN
OF TB AND HIV

through the creation of universal access to timely and high quality diagnosis and treatment of tuberculosis and its resistant forms, the expansion of evidence-based prevention, diagnosis and treatment of HIV infection, and the establishment of sustainable and resilient health care systems

CO «100% LIFE» WITHIN THE

TESTING

The rest of the detected HIV+ clients are at the diagnosis confirmation stage

10,6% case finding yield

Reduced time from the moment of HIV testing to the client's linkage to treatment

80% of clients were registered in dispensary records within a month since day of passing a rapid test

67% started ART within a month from the date of registering in dispensary record

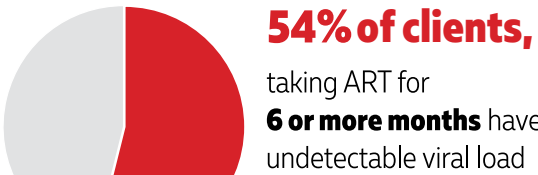

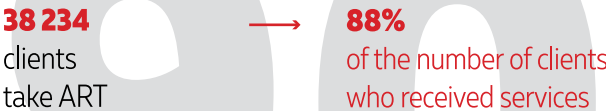

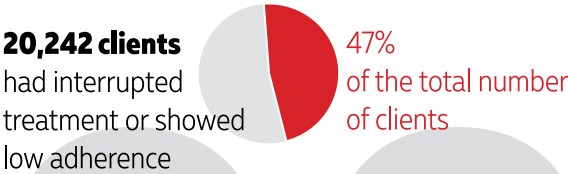

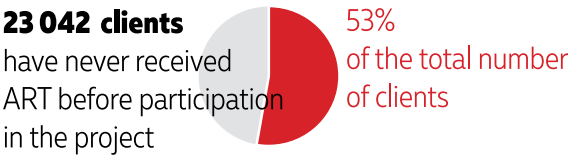

58% started ART within a month from the rapid test day

FRAMEWORK OF THE GLOBAL UNAIDS 90 90 90 STRATEGY

TREATMENT AND SUPPORT

43 284 clients received services

Major efforts have been made to expand treatment and reach clients with low adherence to treatment

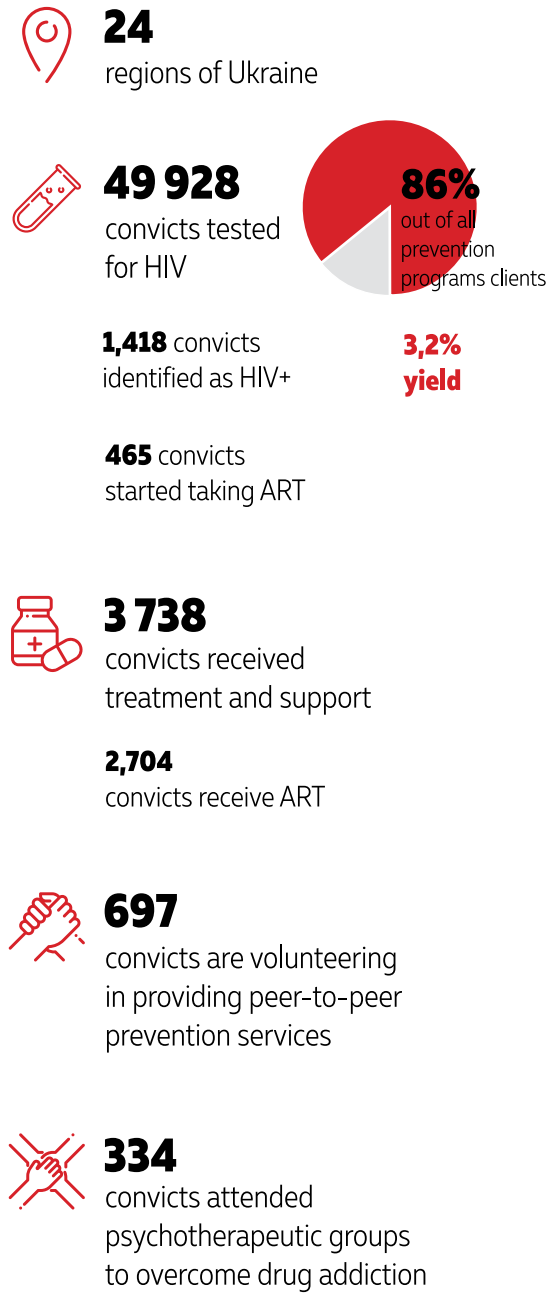

17 317 HIV+ patients out of 32 002 HIV+ patients who take ART for 6 months or more

PENITENTIARY SYSTEM*

TREATMENT AND SUPPORT

* Assistance to clients in the penitentiary system was supported by the Global Fund and the Project «For the sake of life» (PATH) funded by the United States Agency for International Development (USAID)

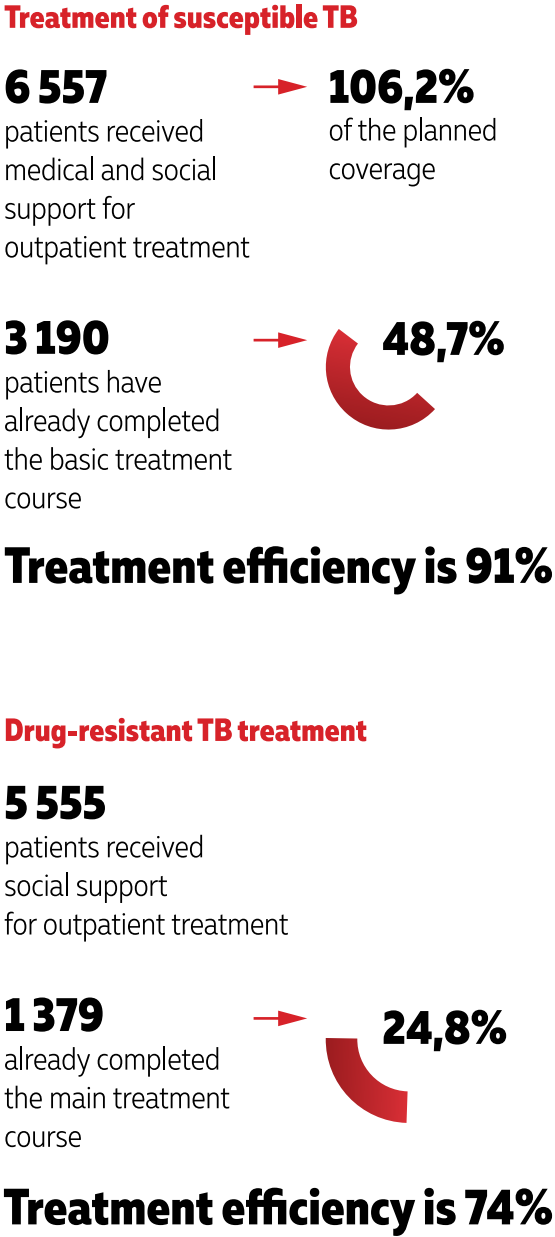

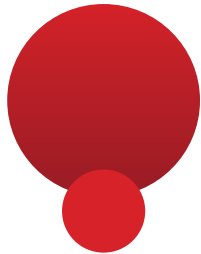

MEDICAL AND SOCIAL SUPPORT FOR TB TREATMENT

25 regions

25 NGOs
from all regions of Ukraine

In total,
out of **12,112** patients covered with services,
2,220 (18.3%) had HIV+ status

ACTIVITY OF THE NGO «INFECTION CONTROL IN UKRAINE» *

* The project was implemented within the framework of the Public Health Center activities

192 patients with susceptible tuberculosis received medical and social support

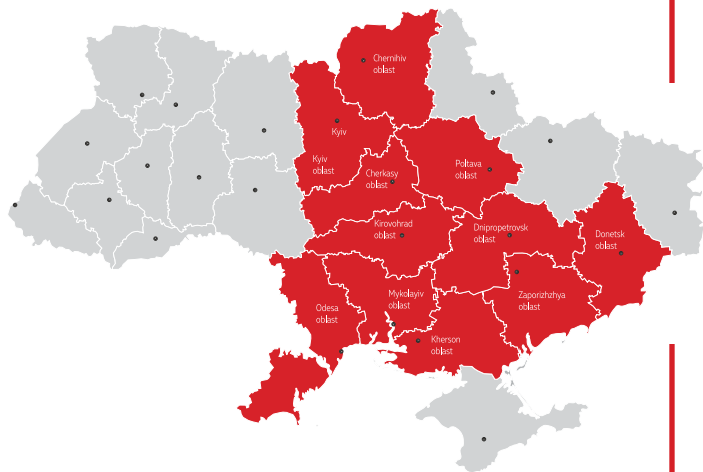

of these **33** HIV+ patients

270 patients with multidrug-resistant tuberculosis received medical and social support

of these **52** HIV+ patients

The project application from the NGO «Infection Control in Ukraine» was supported as a nation-wide model

HEALTHLINK PROJECT: ACCELERATING EFFORTS TO OVERCOME HIV/AIDS IN UKRAINE

HealthLink accelerates the process of overcoming HIV epidemic in Ukraine by allowing **quick and safe access to HIV testing and treatment**

HealthLink is implemented by CO «100% LIFE» in partnership with the ICF «Alliance for Public Health» with the financial support of USAID (United States Agency for International Development)

12 regions of Ukraine
Dnipropetrovsk, Donetsk, Zaporizhzhya, Kyiv, Kirovohrad, Mykolayiv, Odessa, Poltava, Kherson, Cherkasy, Chernihiv oblasts, Kyiv

Efficient testing modalities

PITC

HIV testing for partners of PLWH (Index Testing)

involving men who have sex with men in prevention, testing and treatment (VCT) services

67,873 people were tested for HIV by rapid tests

2,482 HIV+ people detected

1,983 people were registered in dispensary records

1,552 people started taking ART

> 300 health facilities

6,000 doctors completed training on reducing stigma and testing with rapid tests

250 social workers engaged in the project

UAH 39,689,315 distributed among the 12 project regions

ADVOCACY COMPONENT:

Advocating the adoption of a new HIV testing protocol in line with recent WHO recommendations

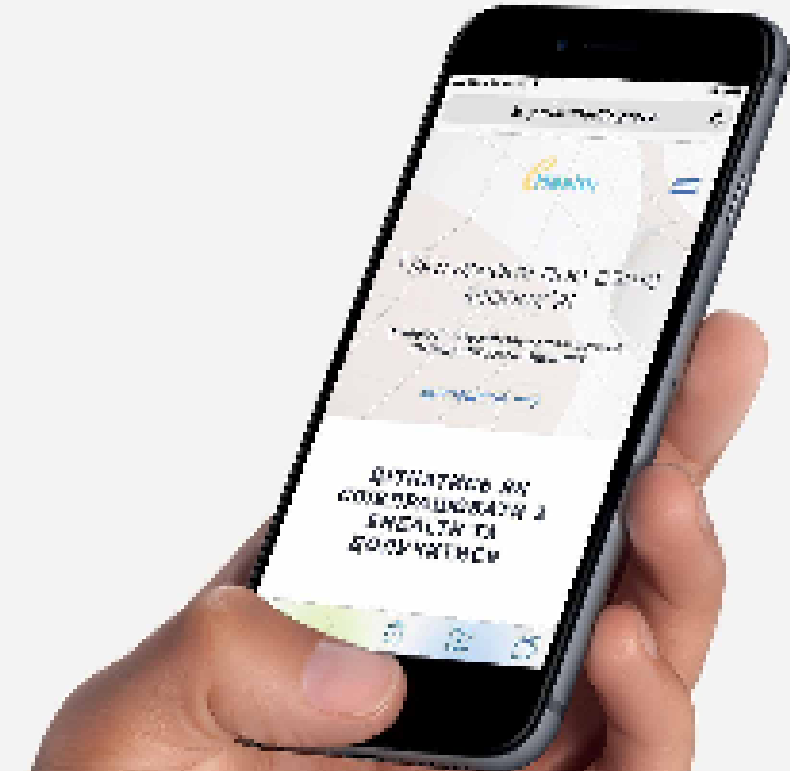

Development and implementation of an educational course for civic activists in partnership with the Ukrainian Catholic University

Support of eHealth system - ensuring stable patient authentication via SMS
16 million patients registered in the system during April-July 2018

Advocacy of procurement of social and medical services at the expense of local budgets in Kyiv and Zaporizhzia for the amount of UAH 1.2 million. Procurement results in other PEPFAR regions are pending

A study «Communication processes among key groups»conducted.

A high-level meeting on the implementation of the plan for the transfer of HIV programs from donor to state funding conducted

**PROJECT
«SMART TECHNOLOGIES
AND INNOVATIONS
IN OVERCOMING HIV
EPIDEMIC IN UKRAINE»
WITH THE SUPPORT OF
UN POPULATION FUND
(UNFPA)**

Outcomes:

online course for family doctors, midwives and gynecologists to reduce the stigma and discrimination towards key affected populations in order to improve access to health care and eliminate mother-to-child transmission of HIV

online database of friendly doctors, allowing representatives of communities affected by HIV the opportunity to receive various medical services from the most tolerant doctors in all regions of Ukraine

**PROJECT GLOBAL FUND
PROGRAM
ON LONG-TERM CAPACITY
BUILDING WITH THE
SUPPORT OF GNP+**

**The representatives of key
populations form the following
countries were trained:**

Armenia
Kazakhstan
Uzbekistan
Ukraine

The training was carried out

«Strengthening the capacity of the community representatives on participating in the Global Fund grant cycle and operation of the Country Coordination Mechanism of Ukraine (CCMU)»

**Agreements signed with community
leaders in**

Armenia
Kazakhstan
Uzbekistan

Advocacy activities to increase the participation of key community representatives in the activities of the Country Coordination Mechanism, to provide technical support in the process of this activity, as well as to create and develop communication platforms at the national level.

**PROJECT STRENGTHENING
THE NGO CAPACITY IN
THE AREA OF INTEGRATION,
REHABILITATION,
SUPPORT AND PROVIDING
SERVICES TO THE
INTERNALLY DISPLACED
PERSONS (IDPS)
IN DONETSK AND DNIPRO
OBLAST**

SUPPORTED BY THE

General population**

434
patients received treatment

**Treatment is carried out by
a modern direct-action antivirals**

PROJECT IMPLEMENTATION OF THE MEDICAL INFORMATION SYSTEM «HIV IN UKRAINE»*

* with the support of the United States Centers for Disease Control and Prevention (CDC) within the framework of the US President Emergency Plan for AIDS Relief - PEPFAR and with the support of the Global Fund

HIV MIS system is modernized:

HIV MIS is transformed into a universal medical system that provides the opportunity to maintain a history of treating patients with other health conditions

Monitoring of TB cases:

data import from the e-TB manager system, screening and registration of patients in MIS

MIS hardware resources have been doubled, and more than 100 software optimization actions have been introduced in order to accelerate the system functioning.

100% LIFE mobile app for HIV+ patients was developed for Android, iOS

Provides additional opportunities to use medical services

1300

HIV+ patients have already installed a 100% LIFE mobile application

HIV MIS data storage and protection is ensured through cloud data center services

Procurement and deployment of software and hardware complex for the creation of the EDS Key Certification Center on the basis of the Center for Public Health of the Ministry of Health of Ukraine was completed

26 computer literacy trainings for 261 health workers were conducted

599 health workers from 225 health facilities are trained to work with HIV MIS:

City of Kyiv
Chernihiv oblast
Volyn oblast
Zhytomyr oblast
Donetsk oblast
Ivano-Frankivsk oblast
Luhansk oblast
Sumy oblast
Kharkiv oblast
Lviv oblast
Chernivtsi oblast
Zakarpattia oblast

Rivne oblast
Khmelnyskyi oblast
Ternopil oblast

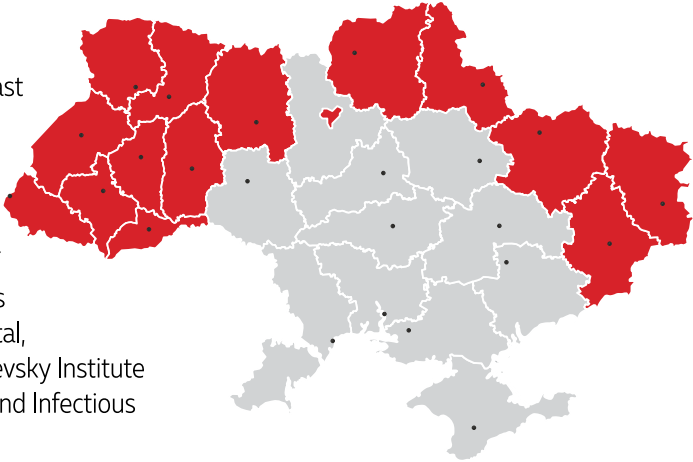

And OKHMATDYT
National Children's
Specialized Hospital,
SE «L.V. Hromashevsky Institute
of Epidemiology and Infectious
Diseases»

605

PCs and network equipment was supplied according to the technical needs of healthcare facilities

According to the Order of the Ministry of Health No. 1251 dated July 4, 2018, the experimental operation of the uniform electronic system of epidemiological and clinical monitoring of the spread of HIV infection (HIV MIS) in health facilities that provide specialized care to patients with HIV infection is conducted.

**PROJECT
«100% LIFE»
WITH THE SUPPORT
OF AIDS FONDS**

**Improving access to HIV treatment by
eliminating intellectual property barriers**

Increased awareness of patient organizations in Ukraine on patent monopolies

Joint position of patient organizations regarding legislative proposals «100% LIFE» in the field of patent law

The draft law of the Verkhovna Rada of Ukraine No. 9385, which contains the proposals of the CO «100% LIFE» on restricting patent monopolies is under consideration.

**PROJECT
OF «100% LIFE»
AND UKRAINIAN
HELSINKI HUMAN
RIGHTS UNION**

1,712 customers obtained legal advice

104
cases of legal support

86%
are completed with a positive outcome

Creation of the network for protection of human rights of people living with HIV/AIDS, representatives of key communities and persons with TB

27 cases of legal support in strategic cases of clients. Three cases are being considered by the European Court of Human Rights

The draft order «On Amendments to Annex 1 to the Procedure for the referral of women for the first course of infertility treatment with assisted reproductive technologies upon absolute indications for budgetary funds» was issued for public discussion.

Parliamentary hearings on the topic **«Preventing and combating discrimination against women from vulnerable populations»** and drafting a resolution of the Verkhovna Rada on the approval of recommendations upon outcomes of these hearings have been held.

Development and inclusion of issues focusing on the problems faced by HIV+ clients in the Sixth Periodic Report of Ukraine on the implementation of the provisions of the International Covenant on Economic, Social and Cultural Rights, to be held in 2019

Practical guide «YOU HAVE THE RIGHT» is developed and printed.

Four trainings for lawyers and social workers who provide legal/social support for people living with HIV/AIDS, representatives of key communities and persons suffering from TB have been held.

PROJECT «100% LIFE»
AND OLENA PINCHUK
FOUNDATION*

* In the framework of the project,
Dolutegravir was delivered to Ukraine
for the first time in 2017

The Network is the operator of ARV
drugs procured at the expense of
the Olena Pinchuk Foundation

the ground

COMMUNITY

100%LIFE

DEVELOPMENT

INVESTMENTS IN THE COMMUNITY DEVELOPMENT = STRONG COMMUNITIES

Men having sex with men (MSM)

Three largest MSM organizations have created a consortium that united the community in all regions of Ukraine.

The Church initiated a dialogue with representatives of the LGBTI community for the first time.

Country-level dialogue on legalization of same-sex partnerships was initiated for the first time.

Former prisoners

An all-Ukrainian association of former prisoners and persons released from prisons has been registered – CO «Free Zone».

Amendments to the Order of the Ministry of Justice for the employment of people in detention centers was amended for the first time.

For the first time, 8 convicts were officially employed in public organizations.

People who inject drugs (PWID)

The PWID community has created 10 regional offices in 10 regions of Ukraine.

A working group on the decriminalization of drug users at the National Council on TB and HIV/AIDS was created.

The amendments proposed by the community to the charts of small, large and especially large amounts of narcotic drugs reviewed.

In 10 oblasts of Ukraine community representatives were included in the HIV and TB coordination councils.

Representatives of MSM, HIV, sex workers, TB patients community, adolescents living with HIV were included in the National HIV and TB Council and regional coordination mechanisms.

Sex workers

Sex workers united in 15 regions of Ukraine.

Draft law on de-criminalization of sex work was developed.

Positive women

Women living with HIV have made amendments to the MoH order that will provide access to budget-funded assisted reproductive technologies for HIV-positive women.

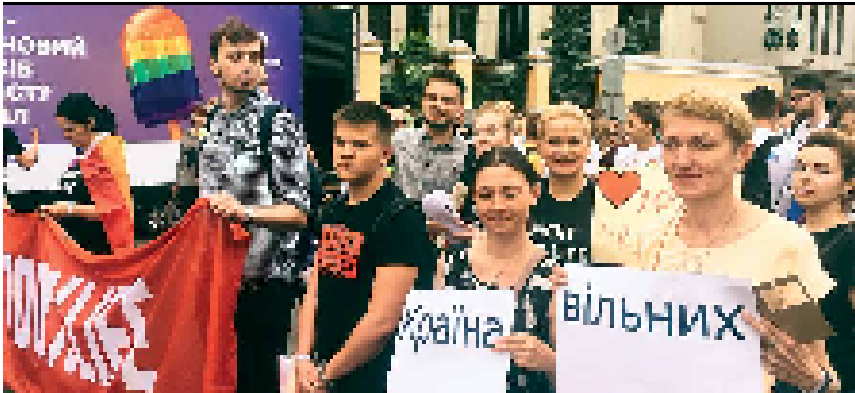

The community unites initiative groups in 10 regions of Ukraine.

Adolescents living with HIV

2 national forums for adolescents affected by the HIV/AIDS epidemic were held.

The community is fostering 25 new leaders.

«100% життя» на KyivPride, 2018

ACCESS TO TREATMENT

In the 2018 budget, the state funding for HIV/AIDS, tuberculosis, viral hepatitis and procurement programs for OST has been saved at the level of the previous year.

UAH 359 million

UAH 100 million

saved on public procurement of ARV drugs due to procurement plan optimization

saved on public procurement of anti-TB drugs, due to optimization of the procurement nomenclature

REGISTRATION OF NEW DRUGS IN UKRAINE

Daclatasvir (generic)
Sofosbuvir (generic)
Sofosbuvir/Ledipasvir (generic)

For the first time included in the state procurement nomenclature
Daclatasvir for Hepatitis C treatment

«100% LIFE» AGAINST PHARMACEUTICAL MONOPOLIES FOR MEDICINES

Patent for Sofosbuvir

As a result of the patent challenge in the Ukrpatent (Ukrainian Patent Agency)

Sofosbuvir (generic version)
UAH 1,740*

Sofosbuvir/Ledipasvir
UAH 2,420*
the full course of treatment

Advisory support for Georgian and Moldovan non-governmental organizations (OSF Georgia and CSO Positive Initiative) was provided in the field of intellectual property and access to treatment

*according to official exchange rate of UAH to USD (average for 2018)

PROZORRO PROCUREMENT CONTROL

Thanks to advocacy activities of the CO «100% LIFE» in partnership with the Center for Public Health and the State Penitentiary Service of Ukraine

UAH 54 000 000

**were saved on state procurements
of drugs for the treatment of hepatitis C
in convicts**

Monitors of the Chernihiv branch of the Network revealed violations in procurements of the medicines and medical products by the National M.M. Amosov Institute of Cardiovascular Surgery for the total amount of

UAH 5,764,057.87

The audit findings were forwarded to the National Police of Ukraine.

Monitors of the Lviv Branch of the Network revealed a number of payments to the oblast municipally-owned facility «Chernivtsi Emergency Hospital» for the amount exceeding the legal thresholds for procurement via e-data. However ProZorro system did not contain such procurements. During the audit, the State Audit Office confirmed the illegal procurement of disinfectants amounting to

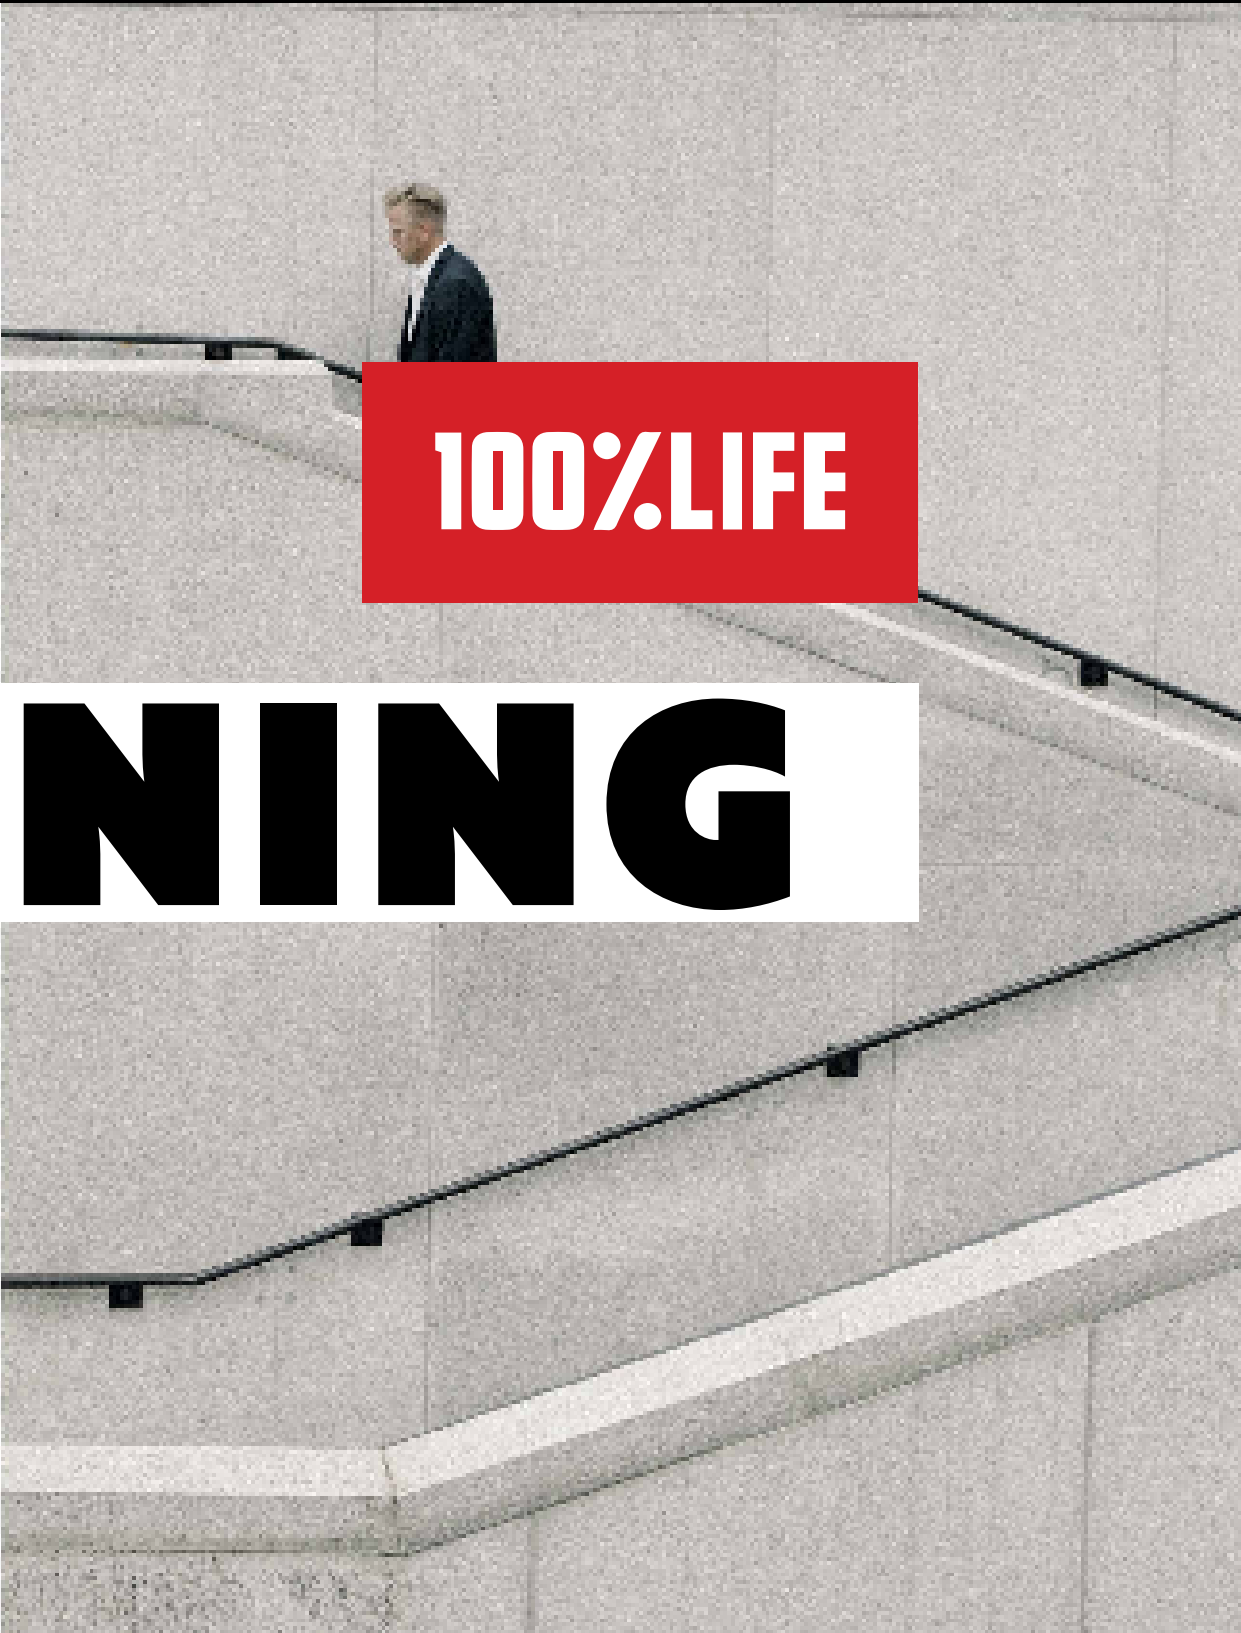

UAH 520,045

Upon this audit an administrative offense protocol regarding the tender committee members was filed, the respective case is open for court proceedings.

TRANSITIONING

**FROM DONOR
TO THE STATE FUNDING**

100%LIFE

According to an agreement between the Global Fund and the Ukrainian government, donor funding for the HIV program will decrease starting from 2019. Already in the second semester of 2019, public health services will be financed from the state budget for the first time through the public procurement mechanism.

In this way, the state will be able to comply with its commitments to implement the transition plan and maintain proportions in the planned co-financing of the epidemic at the level of 20-50-80 (20% coverage in 2018, 50% in 2019 and 80% in 2020)

The key and most qualified providers of such services in Ukraine are NGOs, which must adapt to new financing mechanisms and enter public procurement via social contracting mechanism.

UKRANIAN HEALTHCARE TRANSFORMATION

100%LIFE

Doctor Ulana Suprun
acting Minister of Health
of Ukraine

Cooperation and feedback from patients are necessary prerequisites for the change the entire MoH team is working on now. CO «100% LIFE» as the largest patient organization possesses a high quality expertise which drives and powers that change

On February 5, 2018, «100% LIFE» handed the MVP of the Electronic Health System (eHealth) over to the Ministry of Health.

eHealth made it possible for physicians and patients to conclude electronic declarations, form basic medical registers, enter into electronic contracts between health facilities and NHSU, collect the necessary statistics and, most importantly, make payments under the new primary health care financing system.

EHEALTH SYSTEM

>1 700
healthcare
facilities

24 300
primary
care
physicians

24,9 mln
patients
are registered
in the eHealth
system

as of the end of 2018

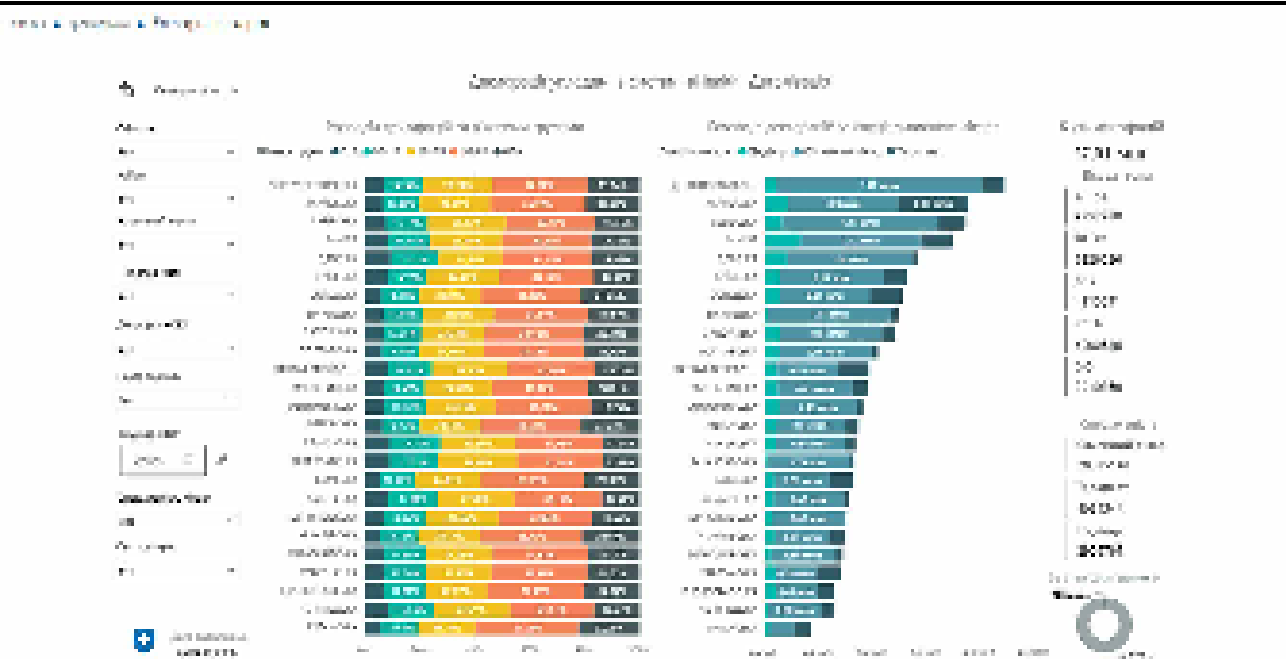

For each of these patients doctors received payments from the state budget, which increased the salaries several times, fostered competition, and, in the mid term, would increase the quality of provision of medical services to patients.

In 2018 eHealth system has been supplemented with new modules – e-Prescriptions, Medical events and others, which will enable the reimbursement of drug costs («Affordable Medicines» program) on the basis of electronic prescriptions in 2019, as well as the collection of medical data and the formation of electronic patient records

This will significantly reduce the number of papers that the physician has to fill and the patient has to store, improve the quality of data for decision making and payments, as well as stimulate the creation of an entire ecosystem of additional electronic services for patients and healthcare providers.

Electronic system «Central 103» was created to unite regional emergency care routing centers.

The system allows standardization of emergency call handling, optimization and a significant reduction in call processing speed, and the collection of statistics. The system is launched in pilot regions. It processes more than 3,000 calls per day, containing data of more than 7,000 employees from more than 500 infrastructure facilities. The volunteer emergency services are connected to the system.

PATENT REFORM

On February 1, 2018

At the initiative of the MEDT, the government registered a draft law **No. 7538** aimed at patent protection reform and containing important provisions on the restriction of patent monopolies on medicines in Ukraine, which would increase competition among drug manufacturers.

Specialized Parliamentary Committee on Education and Science supported Draft Law **No. 7538**

On September 4, 2018

draft law **No. 7538** failed to gain the necessary number of votes in the first reading because of the MPs absence in the session hall

A similar draft law **No. 9088** was registered almost immediately by MPs *O. Spivakovsky, O. Opanasenko, M. Knyazhytskyi, H. Hopko*

Draft law **No. 9088**

Provides for the prohibition of the patenting of new known drugs, in particular salts, esters, ethers, compositions, combinations and other derivatives, polymorphs, metabolites, pure forms, particle sizes, isomers, new dosages, or any new properties or new uses of the known medicinal product.

This will significantly reduce the number of low-quality pharmaceutical patents by limiting the practice of «evergreening»*.

Both draft laws contain almost all provisions aimed at improving the accessibility of medicines, except for one provision that can significantly change the future of pharmaceutical patenting by increasing the requirements for pharmaceutical patents.

The Ministry of Economic Development and Trade published their own draft law **No. 9385** for public discussions

After the advocacy of the CO «100% Life» jointly with the CF «Patients of Ukraine», the MEDT introduced the respective provision to the government draft law **No. 9385**, registered on December 10, 2018.

This draft law fully integrates the proposals from the patient community.

* «Evergreen» patents – the business strategy of pharmaceutical companies-monopolists, aimed at artificial prolongation of the monopoly position of the product in the market, through minor modifications to the medicinal product, which can be further patented, which allows to extend the monopoly over a medicine which has long been available on the market, sometimes for decades. This allows you to maintain high drug prices while there is a patent monopoly.

At present, Ukrainian legislation in no way limits such obvious abuses of patent rights, and according to a study conducted in 2017 concerning 40 patents issued in Ukraine for 20 medicines for the treatment of HIV, hepatitis C, tuberculosis and cancer, found that about 60% were «evergreen» patents.

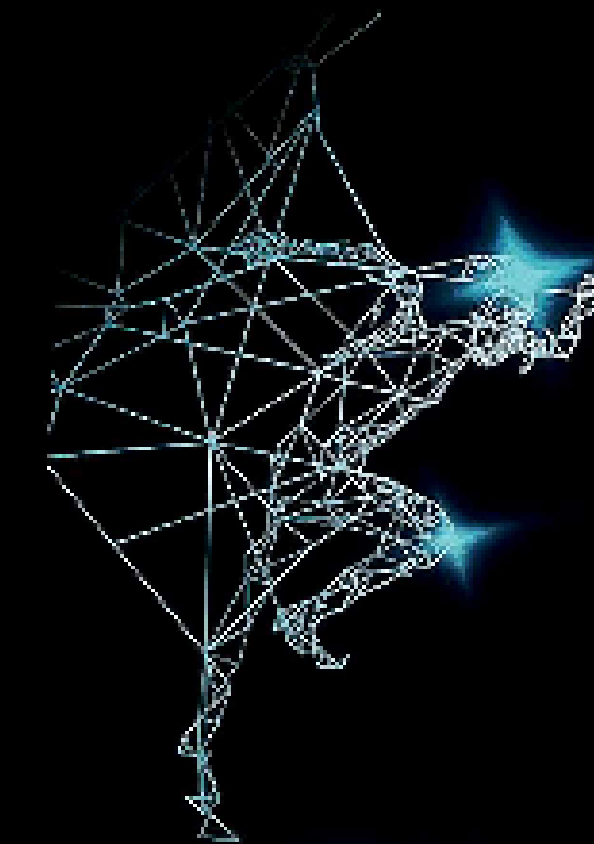

MODERNIZATION OF HIV LEGISLATION: **removing legal barriers to access to treatment and expansion of rights of people living with HIV**

Patient control and support to the World Health Organization (WHO) inclusion to the list of sources of clinical guidelines that may be approved as new clinical protocols in Ukraine were carried out (Order of the Ministry of Health of Ukraine dated September 26, 2018, No. 1752).

Adoption of this order will allow the use of modern treatment regimens in medical practice in accordance with the latest WHO recommendations.

The approval of the official translation of the WHO clinical guidelines for HIV testing and treatment from 2018 by MOH is pending. Upon its approval these recommendations will become mandatory in Ukraine.

Olha Rudneva,
Director of Olena Pinchuk
Foundation

I believe that, regardless of the diagnosis, every person has the right to life. We have been lingering too long in the reality where people with HIV were at the very bottom of the list, were forced to conceal their status and did not even expect quality service delivery. For years, we were forced to believe that our patients deserve dilapidated hospitals, indifferent doctors, and poor quality treatment. But we did not surrender. People with HIV and their relatives did not surrender too. And today we can say with certainty that our patients can rely on the best doctors, advanced equipment and the latest technology. Activists made it possible where the state failed do so. The first medical center «100% LIFE», which was opened in 2018 by the patient community in Kyiv, sets the standard for providing assistance to people diagnosed with HIV and not only for them. We believe that with this new location on the city map the major changes in the quality of service delivery to people living with HIV are taking their roots.

**On May 19
the second Medical
Center «100% LIFE»
was opened in Kyiv**

**The first center
was opened
in autumn 2016
in Poltava**

**Repair works
in the two centers
in Chernihiv
and Zaporizhzhya
are about to
be completed**

Poltava

2 669 – the number of services provided
UAH 1,039,620
received for provided services

286

patients signed a declaration with the primary care doctors of the «100% LIFE» center during the first three months upon launch of the declaration signing campaign

UAH 17 522.50

received from the state budget within the framework of the primary care reform

The medical center in Poltava reached a break-even point and no longer needs investments

Earned income was spent on improving family doctors' equipment.

Kyiv

1 230 services provided
UAH 567,969
received for provided services

303

patients signed declarations with the primary care doctors of the «100% LIFE» center in the first three months upon launch of the declaration signing campaign

UAH 36 238.50

received from the state budget within the framework of the primary care reform

20 types of vaccines procured for the prevention of flu, measles, hepatitis A and B, diphtheria, tetanus, whooping cough, polio, yellow fever and other diseases in adults and children

667 people were vaccinated

About medical centers:

Medical centers provide services to both general public and representatives of communities and risk groups

Centers are inclusive and open to everyone.

The motto of our work is «100% Tolerance»

By signing an agreement with the Ministry of Health, in 2018 the centers became part of the state healthcare system and are entitled to sign declarations with family doctors

In the first three months since opening
580 patient declarations were signed

Health centers provide the following services:

Primary healthcare | Vaccination | OST | HTC

In the first semester of 2019 it is planned to introduce the following services, which will be provided free of charge for the patients who need them:

ART | **PReP**

Medical Center «100% of Life» was developed with the financial support of international donors:

the Global Fund to Fight AIDS, Tuberculosis and Malaria, and the Expertise France 5% Initiative. The modern medical equipment of the gynecological room of the Kyiv center was procured with the assistance of the Olena Pinchuk Foundation.

100% ACTION

**AWARENESS RAISING
EVENTS AND CAMPAIGNS**

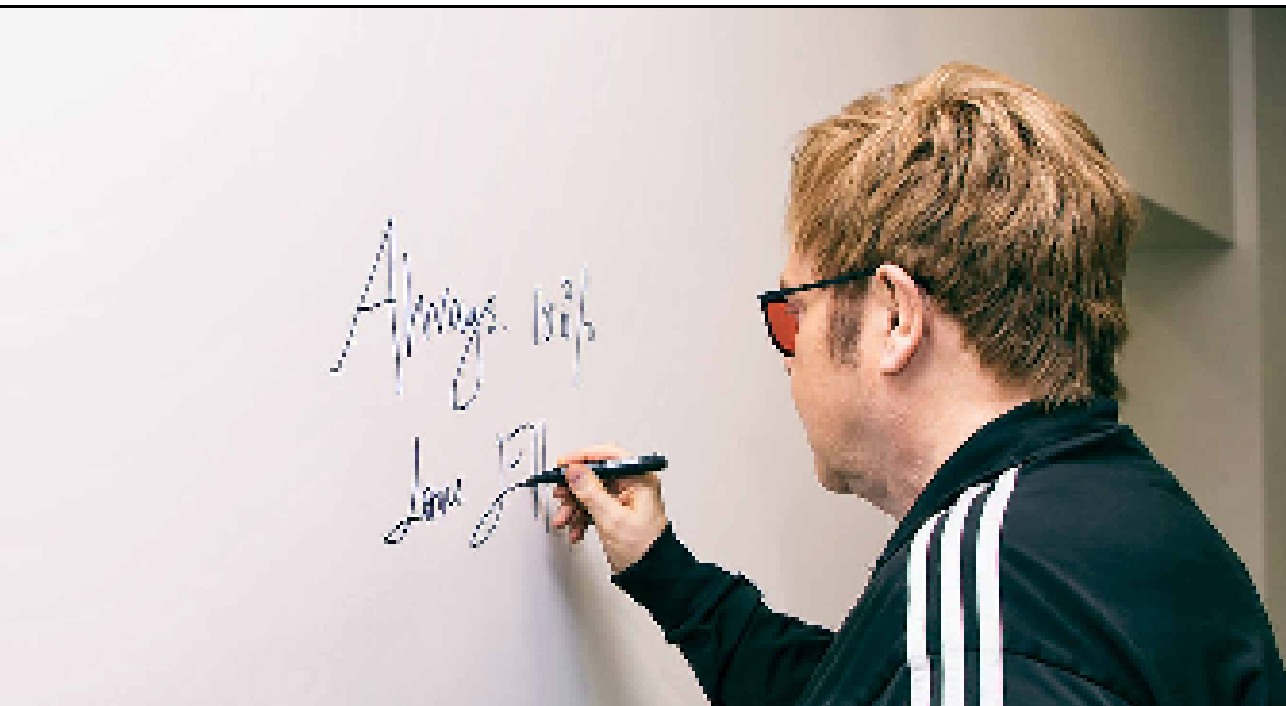

«About 15 years ago we supported the All-Ukrainian Network of PLWH, which at that time was a small group of ex drug users who passionately wanted to do something to help their members who were dying of AIDS. They had no services at all. There was no support and huge stigma against PLWH. Fast forward a few years and the Network are reaching 30,000 people a month. Then they are approved as the Global Fund's principal recipient for treatment and care for HIV in Ukraine! They are working with the Ministry of Health and helping to lead the national response in Ukraine. A few years later they successfully negotiated with the government to dramatically reduce drug prices for people living with HIV across Ukraine... And just 4 weeks ago we visited a brand new hospital for PLWH in Kyiv – the first of its kind – established by the Network, who showed us a new app that they are working on in collaboration with the Ministry of Health to encourage people across the country to get tested and get on treatment!», said Anne Aslett, Chief Executive Officer of the Elton John Foundation during the 22nd International AIDS Conference AIDS-2018 in Amsterdam

Anne Aslett

Chief Executive Officer
of the Elton John Foundation

May 28, 2018
**Charitable event «A Day with Elton John»
at Kurazh-Bazar**
